ESTABLISHED 1835

HOEN BUILDING
Lexington St., opposite City Hall.

BALTIMORE.

We respectfully invite attention to the wonderful advancements made in Art within the past few years and the cultivation of the taste for the beautiful, now so necessary for successful business enterprise. To the Art of Lithography is this advancement almost entirely due; for in no other Art do we find such wonderful improvements or such demands for the best efforts of the Artist.

Our House, which is the oldest of the kind in this Country, has grown and kept pace with the growth of Baltimore. We have added to our business from time to time, all facilities and improvements introduced and found valuable, besides many inventions of our senior partner, among others our Patent Lithocaustic Process, (in which style the plate on the reverse of this is executed,) acknowledged to be the greatest invention since the time of Senefelder. Our facilities are to-day unsurpassed by any establishment in the Country. All our productions are strictly upon special orders, and our Customers are given the benefit of our entire efforts and experience. Estimates cheerfully given. Reasonable prices and first-class work guaranteed.

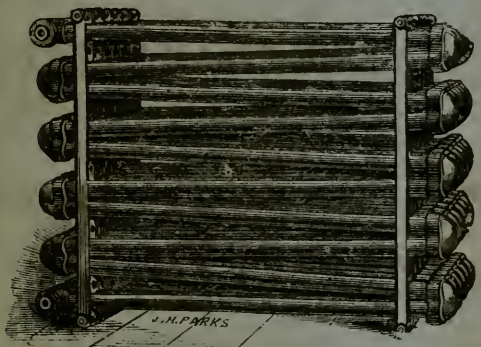
ENGINEERS,

AND NANUFACTURERS OF HIGH AND LOW PRESSURE

STEAM HEATING APPARATUS,



—FOR—

PUBLIC and PRIVATE

BUILDINGS.

SPECIAL ATTENTION GIVEN TO

HEATING FACTORIES

—BY—

EXHAUST STEAM.

We are prepared to contract for warming and ventilating by STEAM, Public or Private Buildings of any size or construction, either by DIRECT OR INDIRECT radiation, high or low pressure.

By the first method we place coils or radiators in the various rooms, and convey the steam to them through mains properly run and connected. The coils can be protected, if required, with ornamental screens and marble tops

By the second method, the coils are placed in chambers in the basement and convey the heat through flues to the different rooms above. For return circulating heating work, which is now adopted by nearly all the principal houses engaged in heating, our IMPROVED VERTICAL TUBE COIL is the best that has been tried. It works equally well with high or low pressure, without noise, and contains more heating surface in less space, besides being highly ornamental.

For buildings in which they have been successfully used, we refer to the following:
